

Nevada Department of Education & Discovery Education

Thanks to the partnership between Discovery Education, Nevada Department of Education, and Nevada Gold Mines, Nevada educators have the opportunity to enhance their teaching and bring the real world to students with dynamic, supplemental resources for all subjects and grade levels.

Connecting what is being taught in the classroom to the real world is critically important to preparing our students for tomorrow. Discovery Education's K-12 learning platform provides relevant, high-quality, and engaging supplemental digital resources to engage students in any learning environment. Our Ready-to-Use activities, instructional strategies, and Quiz features save teachers time and support student engagement through one secure platform that easily integrates into your learning management systems.

Included in Your Discovery Education Partnership
